Pine county, Nevada, has just been proven up. The letter was written by L. B. Smith, the secretary and reasurer of the company, who relates that he has just returned to Eureka from the mines. that he has fust returned to Eureka from the mines.

A body of rich sand carbonates, from four to nine feet thick, has been driven through in the lowest working of the Homestake ground. It has also been followed down in a winze for a depth of fifty feet, the vein dipping at an angle of 60 degrees between the finest kind of walls. The ledge has a trend to the northeast and is headed directly for the Rocco territory which, up to date, has not been opened up.

Secretary Smith says the strike is the biggest by long odds ever made in the mine and he says, also, that the ore is the best which the property has yet produced, running 35.5 ounces silver and 71.5 per cent lead. The local shareholders in the company will rejoice at the manner in which the property, which has already paid between \$60,000 and \$70,000 in dividends, is coming to the front, as it insures big earnings for the year to come.

## PANIC CHECKED ON WALL STREET

Protective Measure of the Bankers Proved Effective.

BAD BREAK AT THE OPENING

THERE IS STILL APPREHENSION

New York, Dec. 15 .- The protective asures agreed upon by the banks of this city had the effect of checking a dangerous looking decline in the stock market today and the market closed tranquil and rather dull. The undertone at the last was firm and the losses of the earlier part of the day generally were recovered. When Saturday's level had been reached on the recovery the action of the market indicated that the measures taken by the banking community were by no means designed to induce speculation for a rise at this time. Prices of the market leaders as they rose over Saturday's level were held back by very liberal offerings. The statement was made that no fears were entertained of the present situation and that the formation of the protective pool was made that no fears were entertained on the part of its members in the way of supply funds to the market. While the knowledge of the steps taken by the ruling powers in the financial world induced a feeling of great relief in all quarters, the belief was not disguised that the pool was an emergency measure, not differing in kind or degree from those adopted in other periods of crises in Wall street. The action of the market this morning, on top of last week's violent decline, following as that did also a prolonged period of gradual decline, awakened real anxiety over the outcome. The violent measures adopted in the Venezuelan trouble added to the uneasiness.

Sentiment was also a pessimistic one

over the money market. The opening rate was 10 per cent, and the day's rate was 10 per cent, and the day's large syndicate requirements and the heavy accumulations for the Standard to il dividend aroused the fear that there would be additional large withdrawals of credit. Not only the immediate, but the prospective, syndicate needs, running up to many millions of dollars, were calculated to aggravate the fears of borrowers.

San Francisco marked the abatement San Francisco marked the abatement of a demand upon the New York money market which has caused much apprehension. The foreign exchange market also weakened materially. This last named feature was directly due to the higher money rate. What effect upon all these factors may result from the provision of a \$50,000,000 relief fund for the New York money market is a problem which is the subfor future delivery, confined to the forenoon calls, and with only 10,000 shares involved.
